

Lincolnshire Pension Fund – RI Beliefs Statement

The objective of the statement is to set out the Fund's key responsible investment (RI) beliefs. These beliefs will form the foundation of discussions, and assist decisions, regarding the structure of the Fund and the strategic asset allocation. In addition, they will be used to ensure that new members on the Pensions Committee understand previous investment decisions taken.

Belief 1:

Companies with a responsible ESG policy are expected to outperform companies without an ESG policy, over the longer term.

The Committee believes that companies that have well developed ESG policies will generally provide better long term performance than those companies that have not considered ESG factors in their business.

Belief 2:

The Committee considers that company engagement, rather than disinvestment, would be the better approach to fulfilling their responsible investment objectives. However, should a company not respond to engagement, disinvestment should be considered. Disinvestment on a whole sector basis is not within the Committee's beliefs.

Disinvestment is a blunt tool that is not believed to provide the best outcomes over the medium to long term. The Fund will, through its managers and other organisations, engage with companies to bring change, but will consider company disinvestment if engagement fails.

While disinvestment on a whole sector basis is not considered appropriate, the Fund will not invest in companies whose products do not comply with the Geneva Convention.

Belief 3:

Climate change and the expected transition to a low carbon economy is a long term financial risk to Fund outcomes.

The Committee believes that climate change risk and the transition to a low carbon economy should be factored into asset allocation decisions and also investment decisions by managers to reduce the long term financial risk, but also to take advantage of the opportunities that may be available.

Belief 4:

The Committee should focus on meeting its financial obligations to pay benefits to members. Financial considerations should therefore carry more weight than non-financial considerations.

The main objective of the Pension Fund is to ensure that it is able to pay benefits to its members as and when they fall due. Therefore financial considerations will be at the forefront of any investment or asset allocation decisions.

Belief 5:

The Fund's active investment managers should embed the consideration of ESG factors into their investment process and decision making.

The Committee believes that the consideration of ESG factors when making investment decisions should not be an add-on but should be embedded into the whole investment selection process. Any active managers appointed by the Fund will be expected to evidence this.

Belief 6:

The Fund should collaborate with other investors if it could have a positive impact, and also engage with them and investment managers to better understand ESG risks.

The Committee believes that the Fund has a stronger voice when working with others, be it Border to Coast Pensions Partnership, Local Authority Pension Fund Forum (LAPFF) or any other organisations. The Fund will work with them and the investment managers to ensure that it understands the ESG risks and how best to address them. It is considered that the Pensions Committee represents the views of the Fund membership and, in addition, the views of the Local Pension Board are taken into account as part of their review of this document.
