

## **LINCOLNSHIRE COUNTY COUNCIL'S RESPONSE TO CONSULTATION ON THE FOLLOWING DEVELOPMENT PROPOSAL**

**District: East Lindsey District Council**

**Application number: N/110/00268/22**

**Application Type: Full**

**Proposal: Planning Permission - Erection of 27no. dwellings, to include fencing to a maximum height of 1.8m and excavation of land to form an attenuation pond and construction of a vehicular access**

**Location: Land off Marine Avenue, Sutton on Sea**

**Response Date: 19 April 2023**

This report includes the Substantive response of the Local Highway and Lead Local Flood Authority to a planning consultation received under the Development Management Order and includes details of any planning conditions or informatives that should be attached in the event that permission is granted and any obligations to be secured by way of a S106 agreement.

### **General Information and Advice**

#### **Outline applications and contributions**

The anticipated number and type of dwellings and/or the floor space may be set by the developer at the time of application which is used to assess necessary mitigation. If not stated in the application, a policy compliant mix will be used. The number and type of dwellings used when assessing S106 planning obligations is set out on the first page of this response.

In the case of outline applications, once the unit mix/floor space is confirmed by reserved matters approval/discharge of condition a matrix (if appropriate) will be applied to establish any increase in contributions payable. A further increase in contributions may result if there is a reserved matters approval changing the unit mix/floor space.

Please note that although the Definitive Map and Statement proves the existence of any recorded rights of way, there may be further or higher rights that are not shown on this document that the County Council is not currently aware of. This would be especially relevant where the public has had informal access to the site or where there are references to routes across this in maps or other historic documents. As the County Council has received no application to recognise further rights of way affecting the site, no more informed guidance can be offered at this stage.

**Application number: N/110/00268/22**  
**Application Type: Full**  
**Location: Land off Marine Avenue, Sutton on Sea**

## **Highway and Lead Local Flood Authority Report**

**Substantive Response provided in accordance with article 22(5) of The Town and Country Planning (Development Management Procedure) (England) Order 2015:**

**Recommendation:**

**No objection subject to:**

- **Planning Conditions** as detailed below.

**Comments:**

*The proposed site is part of a large area of vacant land in the north-west of Sutton on Sea. The application site is situated on part of the land and positioned to the south of High Gate, north of Marine Avenue and east of South Road. This is an existing residential area with infrastructure in place to serve additional development.*

*The primary vehicular access to the site will be via the existing hammerhead road terminating at the site boundary from Marine Avenue.*

### **Highway safety/Highway capacity**

A development of this size would generate around 15 vehicle movements in the peak hour, which is a level that is not expected to affect the operation of the local highway network.

### **Flood Risk and Drainage**

As Lead Local Flood Authority, Lincolnshire County Council is required to provide a statutory planning consultation response with regard to Drainage on all Major Applications. The Lead Local Flood Authority does not consider that this proposal would increase flood risk in the immediate vicinity of the site.

It is recommended that the surface water drainage condition is included within the decision notice, due to outstanding Ground Investigation details.

### **Off-Site Improvements**

As a result of the proposed development, a series of tactile crossing points are requested to ensure safe passage of pedestrians and the increase of pedestrians accessing the facilities in the centre.

### **Planning Conditions:**

In the event that permission is to be given, the following planning conditions should be attached:

#### Highway Condition 21

No part of the development hereby permitted shall be occupied before the works to improve the public highway by means of tactile crossing points to be provided at the following junctions:-

- Junction of Park Road West and South Road
- Junction South Road and Marine Avenue
- Junction of Willoughby Road and South Road

have been certified complete by the Local Planning Authority.

Reason: To ensure the provision of safe and adequate means of access to the permitted development.

#### Highway Condition 00

The development hereby permitted shall be undertaken in accordance with a Construction Management Plan and Method Statement that shall first be approved in writing by the Local Planning Authority. The Plan and Statement shall indicate measures to mitigate the adverse impacts of vehicle activity and the means to manage the drainage of the site during the construction stage of the permitted development. It shall include

- the phasing of the development to include access construction;
- the on-site parking of all vehicles of site operatives and visitors;
- the on-site loading and unloading of all plant and materials;
- the on-site storage of all plant and materials used in constructing the development;
- wheel washing facilities;
- the routes of construction traffic to and from the site including any off-site routes for the disposal of excavated material and;
- strategy stating how surface water run off on and from the development will be managed during construction and protection measures for any sustainable drainage features. This should include drawing(s) showing how the drainage systems (temporary or permanent) connect to an outfall (temporary or permanent) during construction.

Reason: In the interests of the safety and free passage of those using the adjacent public highway and to ensure that the permitted development is adequately drained without creating or increasing flood risk to land or property adjacent to, or downstream of, the permitted development during construction.

## Highway Condition 33

The permitted development shall be undertaken in accordance with a surface water drainage scheme which shall first have been approved in writing by the Local Planning Authority.

The scheme shall:

- be based on sustainable drainage principles and an assessment of the hydrological and hydrogeological context of the development;
- provide flood exceedance routing for storm event greater than 1 in 100 year;
- provide details of how run-off will be safely conveyed and attenuated during storms up to and including the 1 in 100 year critical storm event, with an allowance for climate change, from all hard surfaced areas within the development into the existing local drainage infrastructure and watercourse system without exceeding the run-off rate for the undeveloped site;
- provide attenuation details and discharge rates which shall be restricted to 5.0 litres per second;
- provide details of the timetable for and any phasing of implementation for the drainage scheme; and
- provide details of how the scheme shall be maintained and managed over the lifetime of the development, including any arrangements for adoption by any public body or Statutory Undertaker and any other arrangements required to secure the operation of the drainage system throughout its lifetime.

No dwelling shall be occupied until the approved scheme has been completed or provided on the site in accordance with the approved phasing. The approved scheme shall be retained and maintained in full, in accordance with the approved details.

Reason: To ensure that the permitted development is adequately drained without creating or increasing flood risk to land or property adjacent to, or downstream of, or upstream of, the permitted development.

### **Informatives**

#### Highway Informative 03

The permitted development requires the formation of a new/amended vehicular access. These works will require approval from the Highway Authority in accordance with Section 184 of the Highways Act. Any traffic management required to undertake works within the highway will be subject to agreement. The access must be constructed in accordance with a current specification issued by the Highway Authority. Any requirement to relocate existing apparatus, underground services, or street furniture because of the installation of an access will be the responsibility, and cost, of the applicant and must be agreed prior to a vehicle access application. The application form, costs and guidance documentation can be found on our website, accessible via the following link: <https://www.lincolnshire.gov.uk/licences-permits/apply-dropped-kerb>.

## Highway Informative 08

Please contact the Lincolnshire County Council Streetworks and Permitting Team on 01522 782070 to discuss any proposed statutory utility connections, Section 50 licences and any other works which will be required within the public highway in association with the development permitted under this Consent. This will enable Lincolnshire County Council to assist in the coordination and timings of these works. For further guidance please visit our website via the following link: Traffic Management - <https://www.lincolnshire.gov.uk/traffic-management>

## Highway Informative 07

The highway improvement works referred to in the above condition are required to be carried out by means of a legal agreement between the landowner and the County Council, as the Local Highway Authority.

For further guidance please visit our website; [www.lincolnshire.gov.uk/highways-planning/works-existing-highway](http://www.lincolnshire.gov.uk/highways-planning/works-existing-highway)
