

LINCOLNSHIRE COUNTY COUNCIL'S RESPONSE TO CONSULTATION ON THE FOLLOWING DEVELOPMENT PROPOSAL

District: South Kesteven District Council

Application number: S22/1928

Application Type: Reserved Matters - Major

Proposal: Application for approval reserved matters for the erection of 40no. dwellings, roads, garages and parking, landscaping, open space and associated works pursuant to outline planning permission S18/1557.

Location: The Grantham Church High School, Queensway, Grantham, Lincolnshire, NG31 9RA

Response Date: 4 October 2023

This report includes the Substantive response of the Local Highway and Lead Local Flood Authority to a planning consultation received under the Development Management Order and includes details of any planning conditions or informatives that should be attached in the event that permission is granted and any obligations to be secured by way of a S106 agreement.

General Information and Advice

Please note that although the Definitive Map and Statement proves the existence of any recorded rights of way, there may be further or higher rights that are not shown on this document that the County Council is not currently aware of. This would be especially relevant where the public has had informal access to the site or where there are references to routes across this in maps or other historic documents. As the County Council has received no application to recognise further rights of way affecting the site, no more informed guidance can be offered at this stage.

Application number: S22/1928

Application Type: Reserved Matters - Major

Location: The Grantham Church High School, Queensway, Grantham, Lincolnshire, NG31 9RA

Highway and Lead Local Flood Authority Report

Substantive Response provided in accordance with article 22(5) of The Town and Country Planning (Development Management Procedure) (England) Order 2015:

Recommendation:

Approve with Conditions

Introduction/Site Location

The Application is for approval of reserved matters for the erection of 40no. dwellings, roads, garages and parking, landscaping, open space and associated works pursuant to outline planning permission S18/1557.

Existing Conditions

The site is where the demolished former Grantham Church High School was located, off Queensway, Grantham.

Highway safety

There are no recorded Personal Injury Accidents in the vicinity. Queensway is an adopted public highway that will provide a safe and suitable access to the site.

Highway capacity

There is no precise definition of "severe" with regards to NPPF Paragraph 111, which advises that "Development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe." Planning Inspector's decisions regarding severity are specific to the locations of each proposal, but have common considerations:

- The highway network is over-capacity, usually for period extending beyond the peak hours
- The level of provision of alternative transport modes
- Whether the level of queuing on the network causes safety issues

In view of these criteria, the Highways and Lead Local Flood Authority does not consider that this proposal would result in a severe impact with regard to NPPF.

Site Layout

Following PAD Meetings, several drawing revisions the most appropriate site layout has been achieved. Further future development is possible with the remainder of the land and a

break in the boundary treatment to the north-east has been provided in order to provide connectivity to the cycleway north of the site. Edge Lanes were encouraged to provide better connectivity and manoeuvres however the developer felt this would have resulted in the loss of too many dwellings.

Flood Risk and Drainage

Flood Risk was assessed at Outline. A written drainage strategy was requested to accompany the Engineering drawing submitted and to also to satisfy the drainage condition requested at outline – this was not submitted. The drainage consists of a roadside swale on the westside of the carriageway of the access road connecting to the attenuation pond – a series of roadside gullies connecting to the Attenuation pond and a new connection is proposed and approved by Anglian Water to the sws on Portmarnock Way.

Off-Site Improvements

No off site improvements could be requested because they would have been dealt with at Outline stage.

Planning Conditions:

In the event that permission is to be given, the following planning conditions should be attached:

Highway Condition 00

The development hereby permitted shall be undertaken in accordance with a Construction Management Plan and Method Statement that shall first be approved in writing by the Local Planning Authority. The Plan and Statement shall indicate measures to mitigate the adverse impacts of vehicle activity and the means to manage the drainage of the site during the construction stage of the permitted development. It shall include;

- the phasing of the development to include access construction;
- the on-site parking of all vehicles of site operatives and visitors;
- the on-site loading and unloading of all plant and materials;
- the on-site storage of all plant and materials used in constructing the development;
- wheel washing facilities;
- the routes of construction traffic to and from the site including any off-site routes for the disposal of excavated material and;
- strategy stating how surface water run off on and from the development will be managed during construction and protection measures for any sustainable drainage features. This should include drawing(s) showing how the drainage systems (temporary or permanent) connect to an outfall (temporary or permanent) during construction.

Reason: In the interests of the safety and free passage of those using the adjacent public highway and to ensure that the permitted development is adequately drained without creating or increasing flood risk to land or property adjacent to, or downstream of, the permitted development during construction.

Highway Condition 26

Before any dwelling is occupied, all of that part of the estate road and associated footways that forms the junction with the main road and which will be constructed within the limits of the existing highway, shall be laid out and constructed to finished surface levels in accordance with details to be submitted to, and approved in writing by, the Local Planning Authority.

Reason: In the interests of safety, to avoid the creation of pedestrian trip hazards within the public highway from surfacing materials, manholes and gullies that may otherwise remain for an extended period at dissimilar, interim construction levels.

Highway Condition 29

The permitted development shall be undertaken in accordance with an Estate Road Phasing and Completion Plan, which shall first be approved in writing by the Local Planning Authority. The Plan shall set out how the construction of the development will be phased and standards to which the estate roads on each phase will be completed during the construction period of the development.

Reason: To ensure that a safe and suitable standard of vehicular and pedestrian access is provided for residents throughout the construction period of the development.

Informatives

Highway Informative 02

In accordance with Section 59 of the Highways Act 1980, please be considerate of causing damage to the existing highway during construction and implement mitigation measures as necessary. Should extraordinary expenses be incurred by the Highway Authority in maintaining the highway by reason of damage caused by construction traffic, the Highway Authority may seek to recover these expenses from the developer.

Highway Informative 05

All roads within the development hereby permitted must be constructed to an acceptable engineering standard. Those roads that are to be put forward for adoption as public highways must be constructed in accordance with the Lincolnshire County Council Development Road Specification that is current at the time of construction and the developer will be required to enter into a legal agreement with the Highway Authority under Section 38 of the Highways Act 1980. Those roads that are not to be voluntarily put forward for adoption as public highways, may be subject to action by the Highway Authority under Section 219 (the Advance Payments code) of the Highways Act 1980. For guidance, please refer to <https://www.lincolnshire.gov.uk>

Highway Informative 08

Please contact the Lincolnshire County Council Streetworks and Permitting Team on 01522 782070 to discuss any proposed statutory utility connections, Section 50 licences and any other works which will be required within the public highway in association with the development permitted under this Consent. This will enable Lincolnshire County Council to assist in the coordination and timings of these works. For further guidance please visit the Highway Authority's website via the following link: Traffic Management - <https://www.lincolnshire.gov.uk/traffic-management>

Highway Informative 09

The existing ground level of the site must not be raised above the ground level of any surrounding land without further consultation with the Lead Local Flood Authority and Local Planning Authority, to consider suitable mitigation measures to ensure that surface water flood risk is not created or increased to land adjacent to the permitted development.
