

## **LINCOLNSHIRE COUNTY COUNCIL'S RESPONSE TO CONSULTATION ON THE FOLLOWING DEVELOPMENT PROPOSAL**

**District:** Lincolnshire County Council

**Application number:** PL/0050/24

**Application Type:** Full – Major Planning Application

**Proposal:** To vary conditions 3 and 9 of planning permission 22/1342/ccc to increase the maximum annual throughput limit for inert and non-hazardous construction, demolition and excavation waste from 30,000 tonnes per annum to 75,000 tonnes per annum and to extend temporary consent for a further three years

**Location:** Swinderby Quarry, Camp Road, Witham St Hughs

**Response Date:** 25 June 2024

This report includes the Substantive response of the Local Highway and Lead Local Flood Authority to a planning consultation received under the Development Management Order and includes details of any planning conditions or informatives that should be attached in the event that permission is granted and any obligations to be secured by way of a S106 agreement.

### **General Information and Advice**

Please note that although the Definitive Map and Statement proves the existence of any recorded rights of way, there may be further or higher rights that are not shown on this document that the County Council is not currently aware of. This would be especially relevant where the public has had informal access to the site or where there are references to routes across this in maps or other historic documents. As the County Council has received no application to recognise further rights of way affecting the site, no more informed guidance can be offered at this stage.

**Application number: PL/0050/24**

**Application Type: Full – Major Planning Application**

**Location: Swinderby Quarry, Camp Road, Witham St Hughs**

## **Highway and Lead Local Flood Authority Report**

**Substantive Response provided in accordance with article 22(5) of The Town and Country Planning (Development Management Procedure) (England) Order 2015:**

**Recommendation: No Objection**

### **Comments:**

The proposal is to vary conditions 3 and 9 of planning permission 22/1342/cc. The minor amendments to extend the period for a further three years will not have an adverse impact upon the public highway and the HGV movements for increasing the maximum annual output for the site have been assessed as acceptable at the time of the original application.

As Lead Local Flood Authority, Lincolnshire County Council is required to provide a statutory planning consultation response with regard to Drainage on all Major Applications. This application does not propose to change the drainage set up for the site. Therefore the Lead Local Flood Authority does not consider that this proposal would increase flood risk in the immediate vicinity of the site.

**No Objections**

Having given due regard to the appropriate local and national planning policy guidance (in particular the National Planning Policy Framework), Lincolnshire County Council (as Highway Authority and Lead Local Flood Authority) has concluded that the proposed development would not be expected to have an unacceptable impact upon highway safety or a severe residual cumulative impact upon the local highway network or increase surface water flood risk and therefore does not wish to object to this planning application.
